

Data Strategy 0.9

Instrumentation Plan

North-Star Metric

Monthly Active Institutional Users (MAIU)

Definition

The number of organizations actively using the mining intelligence dashboard and GIS platform monthly.

Why This Matters

This metric captures whether:

organizations actually derive value

the platform becomes operationally useful

users return consistently

It is stronger than:

page views

raw signups

vanity traffic metrics

because institutional usage directly correlates with:

adoption

retention

monetization potential

Supporting Metrics (Max 5)

1. Acquisition

Metric:

New Organization Signups Per Week

Tracks:

inbound interest

landing page effectiveness

outreach success

2. Activation

Metric:

% of Users Who Successfully Interact With Mining Map + Dashboard Within First Session

Activation Definition

A user is considered “activated” when they:

log in

open the interactive map

search/select a mining region

view mineral analytics/dashboard data

This proves they experienced the core product value.

3. Retention

Metric:

30-Day Returning Institutional Users

Tracks:

long-term usefulness

operational dependence

stickiness

4. Revenue

Metric:

Monthly Recurring Revenue (MRR)

Tracks:

SaaS sustainability

monetization progress

pricing validation

5. Referral / Satisfaction

Metric:

Number of Partnership or Demo Requests

Since this is B2B/government-focused, partnership requests are more meaningful initially than viral invites.

Recommended Tracking Tool

Recommended:

PostHog

Why PostHog?

Advantages

generous free tier

product analytics

session replay

event tracking

self-hosting possible

privacy-friendly

suitable for startups

Alternative Options

Tool	Use Case
Google Analytics	Simple website analytics
Mixpanel	Product funnels & activation
Hotjar	Heatmaps/session recordings

GDPR Exposure Assessment

GDPR Exposure:

YES (Potentially)

Why?

Even if based in Ghana, GDPR may apply if:

EU researchers use the platform

EU mining firms access the system

EU personal data is processed

EU-based staff/partners interact with the platform
