Cost Structure

Fragmented Intelligence

1 No Single Source

There is no unified platform combining mineral production data, geological surveys, and ESG metrics for African markets. Decision-makers must stitch together dozens of fragmented sources.

2 Blind Investor Visibility

Investors lack real-time access to export flows and commodity pricing specific to African mineral corridors, forcing reliance on lagged reports and secondary data.

3 Outdated Explorer Data

Exploration companies and junior miners depend on outdated government geological reports, often years behind reality, leading to costly mis-assessments of prospective areas.

Unified Intelligence

Interactive Mining Map

Live, zoomable geospatial map of all active and prospective mining sites across Africa with drill-down concession boundaries.

Mineral Production Analytics

Real-time and historical dashboards tracking tonnage, grades, and output per mineral type and country.

Mining Concession Visibility

Full concession boundary mapping with ownership chains, license expiry dates, and regulatory status per jurisdiction.

Exportable Reports

One-click generation of custom intelligence briefs in PDF/Excel, formatted for investor, operator, or regulatory audiences.

GIS Intelligence Dashboards

Integrated geospatial layers covering geology, infrastructure, ESG risk scores, and export corridor overlays.

The only Africa-first mineral intelligence platform.

Fusing geology, export flows, Environmental, social, and governance (ESG) signals & AI in one graph.

Designed ground-up for West African mineral complexity

Geospatial-native with concession boundary mapping

Regulatory & royalty intelligence baked in

From drill-hole to deal — one platform, zero blind spots.

01 Africa-First Design

02 AI + GIS Native

03 End-to-End Stack

Hard to Replicate Moat

1

Integrated Full Stack

GEOLOGY + EXPORT + ESG + AI

No competitor combines all four intelligence layers in a single platform. Our stack is co-designed with domain experts, so you get a ready-to-use, highly optimized system. Trying to recreate it with separate tools would be extremely slow and hard.

2

Exclusive Agency Partnerships

GOVERNMENT GEOLOGICAL BODIES

Partnership agreements with national geological agencies give us first-party data access unavailable on the open market, a durable structural advantage.

3

Africa-Only Focus

UNMATCHED REGIONAL DEPTH

Global platforms treat Africa as an afterthought. Our entire team, product, and data model is purpose-built for West African mineral complexity from day one.

Who We Serve

Miners & Mine Operators

Large and mid-tier mining companies needing operational production intelligence and ESG compliance tracking.

Explorers & Junior Companies

Junior exploration firms requiring up-to-date geological maps and concession availability data.

Commodity Traders & Investors

Trading desks and fund managers seeking real-time African export flows and price signals.

Geological Agencies & Regulators

Government bodies that need centralised national mineral data and royalty monitoring tools.

What We Measure

1

Enterprise Retention

% of annual-contract customers who renew. Our primary health indicator.

2

API Call Volume

Monthly volume of programmatic data requests, measures platform adoption depth.

3

Active Intel Queries

Daily active users running intelligence queries across dashboards and reports.

4

Data Freshness SLA

Proportion of data feeds meeting <24h refresh service-level agreement, a trust and reliability signal.

5

MoM ARR Growth

Month-over-month Annual Recurring Revenue growth, the headline business metric.

How We Reach Them

LinkedIn Thought Leadership

Consistent content publishing: market reports, mineral briefs, and regulatory updates. Sponsored content targeting investment and exploration decision-makers.

Mining Conferences & Expos

Engage target customers directly at mining conferences to show case solutions and grow network

Enterprise BD & Partnerships

Direct business development with large mining houses and trading firms. Strategic partnerships with geological agencies accelerate enterprise sales cycles.

How We Earn

SaaS Subscriptions

TIERED DASHBOARD ACCESS

Starter, Professional, and Enterprise tiers with escalating data depth, seat count, and alert frequency. Annual and monthly billing options.

API Licensing

USAGE-BASED DATA FEEDS

Programmatic access to production, export, and ESG data via REST APIs. Priced per data type and call volume, with enterprise bulk licensing available.

Enterprise Intelligence

BESPOKE REPORTS & ALERTS

Custom intelligence briefs, regulatory monitoring dashboards, and tailored alert systems for large operators and institutional investors.

Where We Spend

Cloud GPU & Geospatial Storage

High-performance cloud compute for AI inference, geospatial rendering, and real-time data pipelines. Object storage for terabytes of geological raster data.

Data Acquisition & Third-Party APIs

Licensed feeds from commodity exchanges, customs data brokers, satellite imagery providers, and ESG scoring services.

Field Data Partnerships & Ground-Truth Ops

In-country data partnership fees and field verification operations to validate and enrich remotely-sourced geological and production data.
